

HARMONY TREVENA

SOFTWARE DEVELOPER

ABOUT

I am a continuously curious fullstack software developer passionate about working in teams and finding creative solutions to technical problems. My previous experience as an operations and project management professional has me perfectly positioned to bridge the gap between development teams, designers and operations.

PROJECTS

Taskwork

September 2020

Built with: HTML | CSS | Node | Express | Postgres

View Here: [Live](#) | [Github](#)

A user-friendly project management tool that utilizes the scrum framework, allowing users to track project tasks, review those in flight and boost team efficiency.

- > Project managed a team of 3 junior developers utilizing the scrum framework.
- > Responsible for front-end development, mobile-first fully responsive UI/UX, brand creation and logo design.

To-Do Today

August 2020

Built with: HTML | CSS | Javascript | JSON

View Here: [Live](#) | [Github](#)

To-Do Today provides information about local events, in select cities, that are happening Today! Users can browse information about weather, concerts, festivals, sporting events, breweries and more.

- > Responsible for brand development, graphic design, UI/UX, customization and implementation of the Bulma Responsive Framework.
- > Collaborated with 3 colleagues from initial idea to deployment using the Agile methodology managed through GitHub Project.

Sean vs AI

July 2020

Built with: Python3 | Pygame

View Here: [Demo](#) | [Github](#)

Sean vs AI is a fully interactive puzzle game built in Python using Pygame. The goal is to solve coding problems that would be familiar to an entry-level developer.

- > Contributed player animation built using Pygame methods, game-board design and implementation, and quality control testing.
- > Developed in a team using GitHub, multiple branches and resolving merge conflicts.

EXPERIENCE

DigitalCrafts

Atlanta, GA, USA

Manager of University & Strategic Partnerships

May 2020 – June 2020

Developed an end-to-end implementation process to successfully launch partnerships with universities, educational providers and strategic partners. Found and secured new partnership opportunities to grow business and nurtured relationships through implementation. Coordinated logistics, operations, marketing, and allocation of internal resources.

- > Created and launched partnership implementation process and managed cross-organizational collaboration.
- > Supported 3 university partners in launching and implementing a co-branded coding bootcamp.
- > Implemented and managed partnership specific landing pages, third party customer review accounts, organic marketing content and customer communication.
